Senate Teaching and Learning Committee Agenda

NOVEMBER 5, 2026

1. **Welcome/Roll Call**

Old Business

2. **Approve Minutes**
3. **ITS Survey**
    a. It has been sent!

4. **Common Course Components**
    a. Next faculty senate, I will add as agenda item that this will be "locked down" and not able to edit.

5. **Online Teaching Support:**
   Discussion of proposed MOU.

6. **AI/Spring Goals**
    a. Before December meeting, what goals are appropriate for next semester.

7. **New Business:**
    a. **Night School**. Given current and anticipated growth and limited classroom space, the Provost would like to open a discussion about faculty interest in teaching night classes (after 5 pm). Impinging factors on this matter include: 1) flexible teaching schedules for faculty who may prefer working later on teaching days, 2) student interest in evening classes, 3) possibly scheduling labs and recitations in the evening for lecture courses taught in the day, 3) perhaps using the evening for some teaching overloads, particularly those coming online late in the scheduling process.

The summer full-time status change from nine to six credit hours is an information item only and does not require any Senate action. **TLC may want to formulate a recommendation on the question about night classes, but I think this is primarily an issue where we can gather input from our fellow colleagues and then have a discussion on this issue within the Senate.**
