In response to a DISCUSS list conversation, Campus Planning & Facilities is partnering with Student Affairs and Academic Affairs to develop a policy and action plan to address the needs of our students, faculty, and staff. The first step is to facilitate the creation of a cross-divisional task force to quickly address this issue. The task force would be charged with:

1. Assessing current conditions regarding locations and accessibility of gender-neutral restrooms.
2. Developing a policy consistent with our values of inclusiveness and caring and aligned with current BOR policies and guidelines.
3. Identifying short-term and long-term facility improvement opportunities.
4. Creating a recommended action plan for funding and implementation, and submitting such plan to the Senate Facilities and Services Committee and the President's Cabinet for review and approval.
5. Communicating the approved plan to the campus community.

We hope to complete the charge this semester. Additional information and updates will be forthcoming once the task force begins its work. Thanks again to everyone who has supported this initiative.

Brendan Bowen
AVP, Campus Planning & Facilities
