

Automatic Denying Student Access For Webct Vista

Students will be denied access automatically from their Webct Vista course, for non-payment of their courses. If an instructor has students in their grade book that have been denied access and the instructor did not authorize this by clicking on the check box next to the students name and clicking the deny access button, then the student may have been removed from the course because of non-payment issues.

If there are students that have been dropped instructors can compare their Banweb list to the roll on Vista to see a current class roster. Instructors can choose to **remove** dropped students from the grade book/roll or **grant access** to those students who have paid their fees and appear on instructors Banweb list.

Warning!!!

If an instructor does decide to remove a student – and the student is re-enrolled because they pay their fees or a financial aid problem is worked out, there will not be a way to retrieve any of the students lost data/work.
