Welcome to CAMS.

The center harbors interdisciplinary research related to applied mathematics in discrete and differential equations. Currently there are ongoing projects in Mathematical Biology and Applied Physics.

To contact us:

About Us

Our center's mission is:

- To provide an accessible platform for faculty and graduate students at UWG to address their mathematical need in research.
- To create a center that will foster collaboration between researchers with various backgrounds in the college of Arts and Science and to develop joint interdisciplinary projects, research proposals and publications.
- To serve as a catalyst in the development of state-of-the-art graduate and undergraduate educational programs in applied mathematics at UWG.

About Us

Seminars

Activities

Director

Activities

Our center's activities include

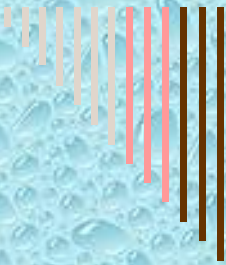

1. Running a regular interdisciplinary research seminar
2. Advising non-math faculty and graduate students of mathematics in their research, theses, study
3. Proposing and carrying out joint interdisciplinary research projects between AS faculty
4. Giving expository talks to increase students' awareness on the interaction and connections between the various areas of science
5. Working with and providing undergraduate students with a hands-on training in research

Seminars

Seminar on Applied Analysis

This is a weekly seminar on Applied Analysis. Speakers are faculty members or invited guests

Seminar Discrete Math

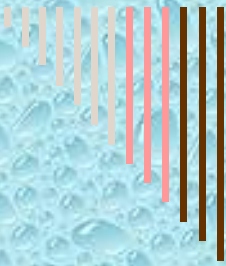

This is a weekly seminar on Discrete Math. Speakers are faculty members or invited guests

Seminar on Math Biology

This is a weekly seminar on Math Biology. Speakers are faculty members or invited guests
