DESCRIPTION

Persons engaged in occupations that require emergency responses must frequently deal with exposure to incidents that are traumatic. Some of these persons develop posttraumatic stress reactions or full-blown posttraumatic stress disorder, while others do not. A key issue in the development of traumatic stress is vulnerability. This book draws from research and life experiences on trauma vulnerability to better understand how mental health professionals and those concerned with the psychological well-being of others may disentangle the perplexing questions of who gets PTSD, why they do, and how we may prevent or minimize this from happening.

Major topics in the text include: assessing psychological distress and physiological vulnerability in police officers; personal, organizational, and contextual influences in stress vulnerability; differences in vulnerability to posttraumatic deprivation; gender differences in police work stress and trauma; trauma types, frequency of exposure and gender differences; personal, event, and organizational influences in police stress vulnerability; vulnerability, war, and prisoner abuse; reducing trauma through personal and response management; psychological vulnerability among international aid workers; prolonged separation and family vulnerability; risk communication and equilibrium theory; a statistical model for measuring trauma vulnerability; and traumatic stress in protective services professions. What is clear from the chapters that comprise this volume is that vulnerability should be conceptualized as a multilevel phenomenon, and the text identifies the contributing levels of analysis that provides the foundation for this process. The text will serve as a valuable resource for professionals in law enforcement, emergency and paramedical services, and the military, as well as to psychologists, psychiatrists, and counselors.

TABLE OF CONTENTS

Preface

Chapter

1. Vulnerability to Traumatic Stress: Personal, Organizational, and Contextual Influences (Douglas Paton & John M. Violanti)

3. Individual Differences in Vulnerability to PostTrauma Deprivation (Jane Shakespeare-Finch)

4. Gender Differences in NYCPD Officer Work Stress and Trauma: September 11, 20 and Its Aftermath (Cheryl Wilczak)

5. Vulnerability to PTSD: Trauma Types, Frequency of Exposure, and Gender Differences (Anne Gherke)

6. Traumatic Stress Vulnerability in Police Officers: Event, Personal, and Organizational Influences (Douglas Paton, Karena J. Burke, & Lynne Huddleston)

7. Vulnerability, Trauma, and War: Toward Understanding Abu Ghraib Iraqi Prisoner Abuse (Paul T. Bartone)

8. Rebuilding Psychological fences: Reducing Trauma Through Personal and Response Management (Cherie Castellano & George S. Everly, Jr.)

9. Psychological Vulnerability Among International Aid Workers (Colleen McFarlane)

10. Family Vulnerability: The Impact of Prolonged Separation (Douglas Paton & Kate Meyer)

11. Risk Communication and Communication Equilibrium Theory (John Gallacher)

12. A Proposed Statistical Model for Measuring Trauma Vulnerability (John M. Violanti)

13. Traumatic Stress in Protective Services Professions: Integrating Vulnerability, Risk and Community Perspectives (Douglas Paton & John M. Violanti)
