September 2016

**RE: DOE Computational Science Graduate Fellowship Opportunity**

Dear Colleague:

The Krell Institute will soon accept applications for the prestigious Department of Energy Computational Science Graduate Fellowship (DOE CSGF). This program provides up to four years of financial support for students pursuing doctoral degrees in fields of study that use high-performance computing to solve complex problems in science and engineering.

**Materials are due January 18, 2017**, and your assistance in identifying qualified candidates for our next class of fellows is vital to the program's continued success. Enclosed you will find a poster outlining the DOE CSGF's unique benefits; please post or share it with someone you consider a good fit for the fellowship. We're also enclosing a copy of *DEIXIS, The DOE CSGF Annual*, which provides a sampling of the work and pursuits of fellows and alumni.

For more information and to request email notification when the online application opens in mid-October, please visit [www.krellinst.org/csgf](http://www.krellinst.org/csgf). There you also will find a downloadable PDF of the poster and magazine and an overview of the more than 425 fellows supported over the DOE CSGF's 25-year history.

As always, I welcome you to contact the Krell office with any questions and I thank you for your support.

Best regards,  
Lindsey Eilts  
DOE CSGF Program Coordinator
