Preface

Dear Reader,

The Academic Affairs division of the University of West Georgia prides itself on having a very active faculty. While maintaining a focus on teaching, faculty members are also actively engaged in their disciplines through scholarly activity and service. This document does not list every single accomplishment of the University faculty, but even in its somewhat abbreviated mode, the list is impressive. Here you will find listed faculty awards, honors, performances, grants received, services rendered, offices held, art exhibitions, and lists of books and articles by some of the most prestigious publishing houses in the country.

UWG faculty are dedicated to the transformational power of learning which includes teaching, research, and professional growth and development. Students are encouraged to participate in high-impact practices such as First Year Seminars, Study Away / Study Abroad, Internships, and Capstone projects. It is quite impressive when faculty involve students in their disciplines through undergraduate research, a cornerstone of experiential learning for anyone truly interested in the inner-workings of academe.

You will also note something a bit new in this document of faculty production and that is notation of an accomplishment that is in some way connected to community engagement. This notation appears in that text as follows: **[CEA]**. West Georgia has always been an institution with ties to our community, both immediate and distant, and has always been engaged in a number of ways; therefore, while a majority of the CEA notations are connected to accomplishments listed under some form of service, there are numerous other notations under scholarship, performances, exhibitions, and grants, to name the most prevalent. The faculty of West Georgia feel an obligation to serve the community from simply lending a hand at public events to making some part of a community need an object of scholarly or artistic inquiry. This longstanding partnership with our community is something we don't necessarily publicize very much but it is of exceptional importance for all of us in the larger community that includes the University.

Sincerely,

David Jenks

Interim Provost and Vice President for Academic Affairs

¹ A notation of [CEA] after a submission designates that the faculty member reported their work as a Community Engaged Activity. A CEA involves a mutually beneficial exchange of knowledge and resources with the larger community (local, regional/state, national, and/or global) and is a self-report measure.

² A notation of **Published/Presented/Created with a student** means that the faculty member reported their activity as being completed in conjunction with a student and is a self-report measure.

¹ A notation of [CEA] after a submission designates that the faculty member reported their work as a Community Engaged Activity. A CEA involves a mutually beneficial exchange of knowledge and resources with the larger community (local, regional/state, national, and/or global) and is a self-report measure.

² A notation of **Published/Presented/Created with a student** means that the faculty member reported their activity as being completed in conjunction with a student and is a self-report measure.
