MASTER OF SCIENCE IN STRATEGIC CYBERSECURITY AND INFORMATION MANAGEMENT

DEFEND AGAINST CYBERCRIME & PROTECT DATA

Get the skills to secure computer systems with a STEM-approved M.S. in Strategic Cybersecurity and Information Management from UWG. The program prepares you for high-demand cybersecurity roles like security analyst, network engineer, and systems administrator.

AT-A-GLANCE

- ▶ 10 Courses
- ▶ Complete in as little as 12 months
- ▶ Course offerings in-person and online
- ▶ Hand-on experience in state-of-the-art SAP Next-Gen Lab

Our program focuses on teaching you how to recognize threats through **Advanced Networking, Information Asset Protection, and Risk Management**. Courses like **IoT Security and Analytics** will help you identify hackers and security risks, while **Security Planning, Systems Development, Cyberwarfare, Cybercrime, and Digital Forensics** will prepare you to respond and recover effectively.

PROGRAM BENEFITS

- ▶ AACSB Accredited
- ▶ Highly qualified faculty
- ▶ STEM Designated program
- ▶ Aligned with industry standards
- ▶ Earn Cisco digital badges and certification vouchers
- ▶ Networking opportunities with industry leaders
