ABOUT THE MAJOR

The B.S. with a major in Economics provides students with the flexibility to build a foundation for further graduate study in business, economics, law, or other professional careers as well as providing a broad liberal arts and economics background for entry level positions in business and government. Students select an additional area of concentration (such as prelaw, communication, history, business, etc.) that matches their career interests. While earning a Bachelor of Science in Economics in the Richards College of Business, students have the opportunity to learn how financial markets work, how products are manufactured, where resources come from and how resources and goods are allocated in an economy. Students also have the opportunity to learn from faculty who explain economic philosophies and show students how to analyze and predict trends. The B.S. in Economics is a popular choice among students who are looking for more flexibility, are minoring or double majoring in a non-business field or who intend to pursue a graduate degree.

ABOUT THIS MAP

This program map is intended ONLY as a guide for students to plan their course of study. It does NOT replace any information in the Undergraduate Catalog, which is the official guide for completing degree requirements. Use this map to help plan and guide your experience at UWG, including academic, co-curricular, and discovery opportunities. Everyone’s experience is different and activities in this map are suggestions. Always consult with your advisors whenever possible for new opportunities and updates.
