

ABOUT THE MAJOR

Students graduating with a B.A. in History find themselves in positions in business, banking, law, archive management, museum work, foreign service, as well as teaching, to name just a few of the hundreds of jobs available for History graduates. Business leaders and personnel managers often say that the most important kind of person they are looking for is one who can adapt, continue to learn, make comparisons and recognize previous patterns which can be modified from the past for the present, communicate effectively and clearly, and who can deal with a multicultural environment. They are looking for someone who is aware of the many levels of ideas, relationships, and identities that make up the human condition. You will be well prepared to meet these requirements. Besides, the study of History is also immensely entertaining and rewarding in itself! Graduates with History degrees often study it because they love it. They may not work in a field directly related to History, but they have successful careers in many other fields.
