New business:

Proposed Senate Committee Restructure- The committee received the proposed changes via email. After review of the rational and purpose, discussion followed.

- Will the Diversity and Internationalization Committee functions remain in the new structure? Yes, these functions are subsumed into the proposed structure.
- With the addition of the Chief of Police to the committee description, will there be a representative from the UWG Police Department to the committee? Discussion also included that all areas affected by the new committee structure should have an aligned representative for inclusion in committee business. This point will be raised to the Faculty Senate during the next Senate meeting.
- What is the time frame for implementation, and how should academic units proceed with recruiting for the next academic year? The target date for implementation, pending an approving vote of the faculty, is AY 2025-2026. Academic units should proceed with recruitment for the current structure, in the event the faculty does not approve the proposal or there are significant changes before approval.

Committee members are encouraged to share the proposal with the faculty in their academic unit and seek feedback to bring to the next Senate Meeting.
