

## **10. Social, Cultural, and Community Psychology Approaches to Social Justice**

This Concentration enfoldes coursework and applied experience that share an explicit commitment to social justice. Courses in this Concentration reflect various psychological frames for social praxis, including social psychology, community psychology, developmental psychology, cultural psychology, feminist psychology; community-based participatory research, and qualitative research writ large. Within this theoretical and methodological umbrella faculty and students seek to apply psychological theory, research, and praxis to various social justice issues such as intersectional forms of oppression, human rights, poverty, intergroup relations, physical and mental health, and community development.
