Bike Lanes
- Bikes ride in separate lane traveling in same direction as motor vehicle traffic

Buffered Bike Lanes
- Bikes ride in buffered lane traveling in same direction as motor vehicle traffic

Separated Bike Lane
- Bikes ride in both directions in separate facility adjacent to motor vehicle traffic

Shared Lane Markings
- Bikes and motor vehicles travel in same travel lane in same direction

Widened Separated Path
- Bikes ride in separate lanes adjacent to pedestrian pathway

UWG bike lanes provide safe and efficient transportation infrastructure for all campus constituents.

What are bike lanes?
Lanes designed specifically for bike riders to travel separate from motor vehicle traffic. Bike lanes are identified with a bike symbol.

How should bike riders use the lanes?
While riding, always use the available bike lanes. Watch out for turning vehicles. If a bike lane is not available, use caution when traveling in a motor vehicle lane. Follow the bike lane arrows and travel in the same direction as the motor vehicle traffic.

What can motor vehicle drivers expect?
Use caution when passing bikes on the road, allowing 3 feet between your motor vehicle and the bike. Always yield to bike traffic and look for bikes before turning. Never drive or park in any bike lane.

Guidelines for Bike West

UWG is proud to announce yet another way for students and employees to Go Green – Bike West. UWG bike lanes provide a safe and efficient infrastructure to those who live and work on campus to travel. The 1.25 mile bicycle track goes around the perimeter of campus and ultimately will connect to the Greenbelt and downtown Carrollton. Combined with a robust transit system and pedestrian-friendly campus, these bike lanes are expected to improve UWG as a sustainable campus. So don’t just Go West - Bike West!

Go West. Go Green.
