

## CHIP Committee Meeting - APPROVED

Date Tuesday, September 25, 2018, 1:30-2:15pm  
Location Nursing 200  
Attendees Members: Profs. Connie Barbour (SON); John Garner (COAH); Gavin Lee (COSS); Anne Merrem (COE); Partha Ray (COSM); Janet Strickland (COE); and Guests: Profs. David Jenks (AA) and Jill Drake (AVP/AA)

### 1. Reminder about Curriculog

Prof. Barbour reminded the committee to review relevant proposals before each meeting.

### 2. Course change in COSM: Modify CHEM 1211 prerequisite options in mathematics to include MATH 1112

**The committee unanimously *approved* the request, *with modification of language*.** The committee asks for a clarification of the language of “concurrent pre-requisite.” The committee understood the language to mean that the requisite course could be taken either before or at once with CHEM 1211.

### 3. Course change in COSM: Modify CHEM 1212 prerequisite options in mathematics to include MATH 1112

**The committee unanimously *approved* the request.**

### 4. Course change in Interdisciplinary Studies: Add XIDS 2002 course offering: “Medicine and Health in the Greco Roman World”

**The committee unanimously *approved* the request, and offered three suggestions.** Prof. Jenks explained the committee’s role in individually approving the topics of this course. The committee considered Prof. Donohoe’s concern regarding SACS approval; and Prof. Jenks clarified the role of SACS in evaluating teaching credentials and of this committee in evaluating for interdisciplinary content. Finally, the committee made three suggestions for the syllabus: (i) depict the learning outcomes in measurable terms or “smart objectives”; (ii) match up the assignments listed (and the percentage-weights of the assignments) with the syllabus’ earlier mention of a “longer research paper”; (iii) place the standardized SLOs of XIDS 2002 on the syllabus.
