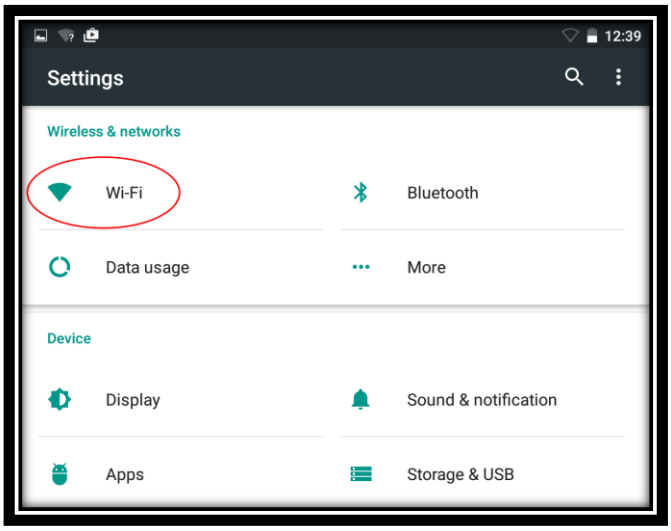
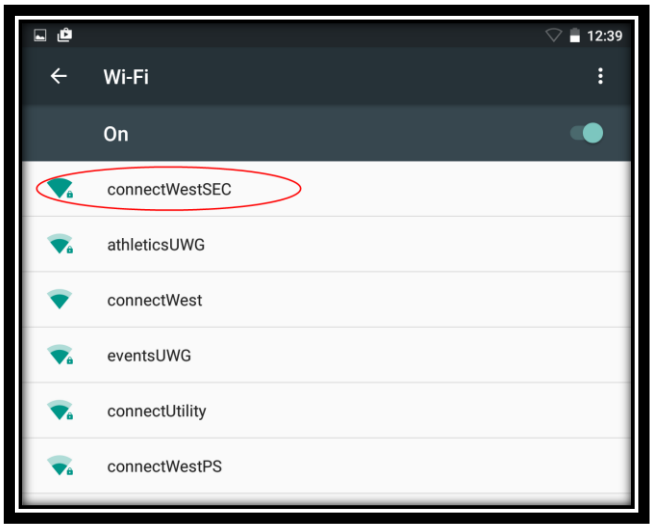
How to set up your Android phone to use the UWG wireless network (if you were previously connected)

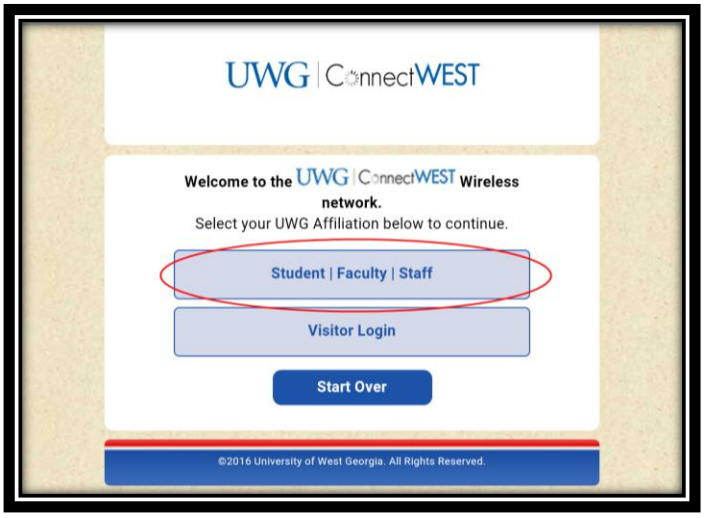
First, you need to remove the existing profile from your device. To do this, go to Apps →Settings → Wi-Fi → click the ConnectWestSEC profile and select "forget" from the pop up that appears.

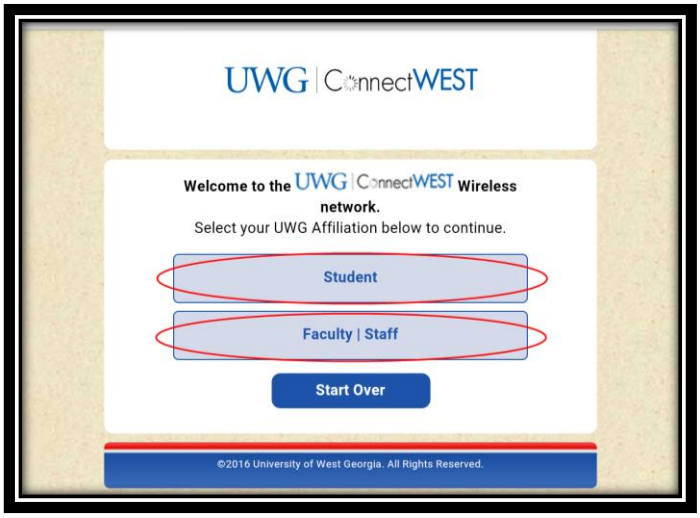




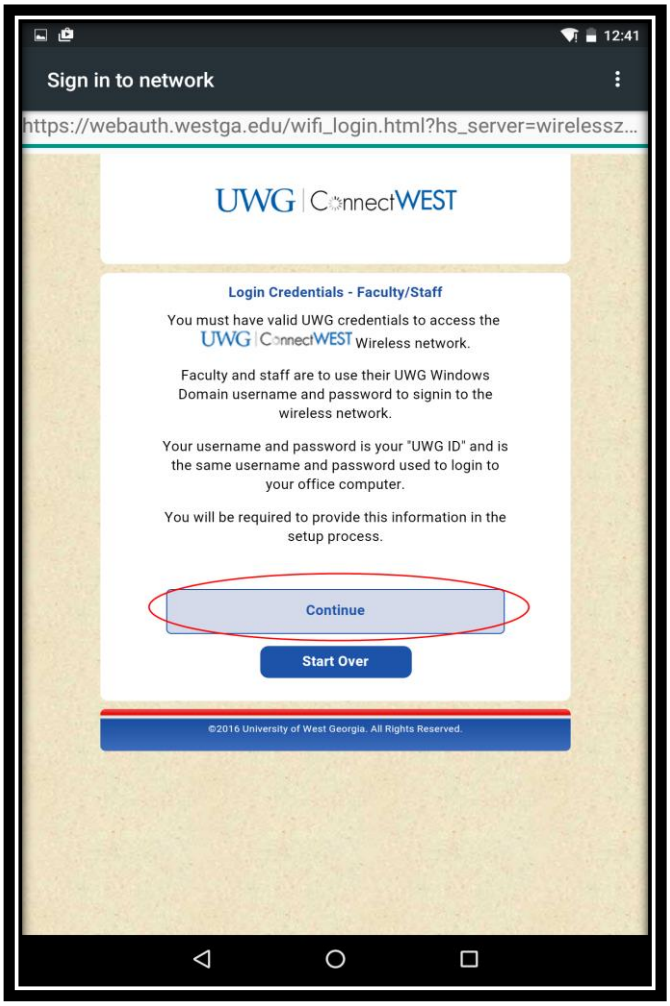
This will prompt you to sign in to a network. Select "ConnectWest". By selecting this pop-up you will be taken to the screen below.

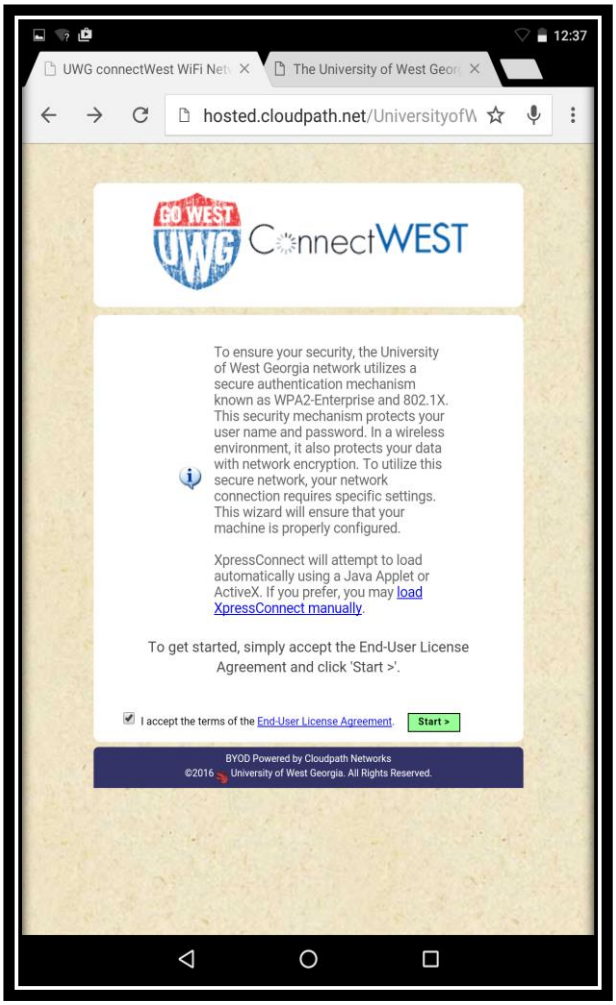
Next, go to Settings → Wi-Fi and connect to the "ConnectWest" network. A popup should take you to http://webauth.westga.edu. Select "Student | Faculty | Staff" and then the button appropriate to you.





Click continue on the following page and then click the green “Start >” button at the bottom





Next select “Direct Download” from the drop down menu and then select “Install”.

ConnectWEST
Android Devices
1. If you do not already have the XpressConnect app installed, please select an install option and click the "Install" button.
Direct download
Install
2. After installing the XpressConnect app:
Setup WiFi
If using a Samsung Galaxy S5, or the button above does not work, tap here.
If clicking the Setup WiFi button does not start the XpressConnect app, please use the built-in Android browser, or the Chrome browser.
Android versions 2.1 (circa 2010) and newer are supported. If you have an Android device with an older Android version you will need to configure it manually.
If this is not an Android device, click here to view other supported devices.

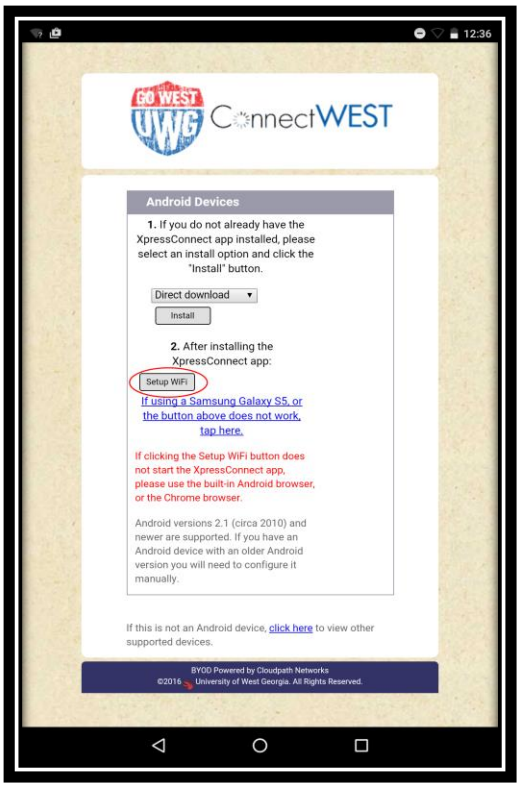
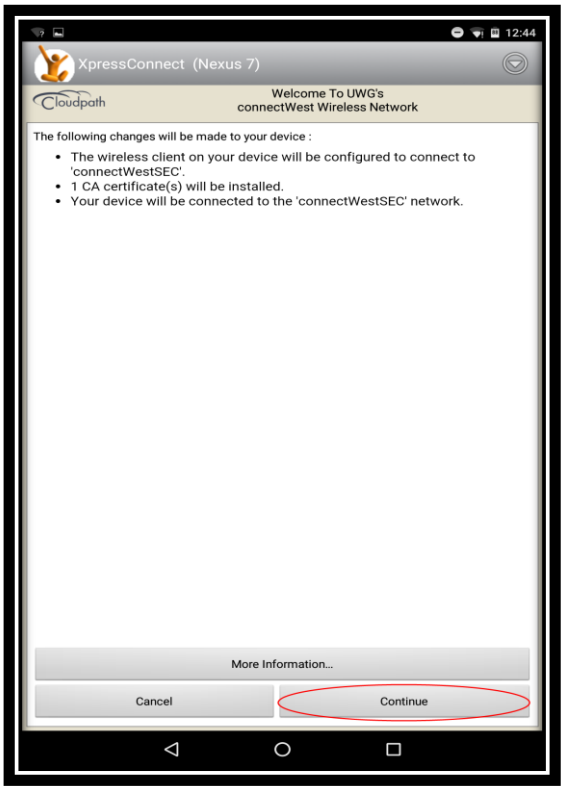
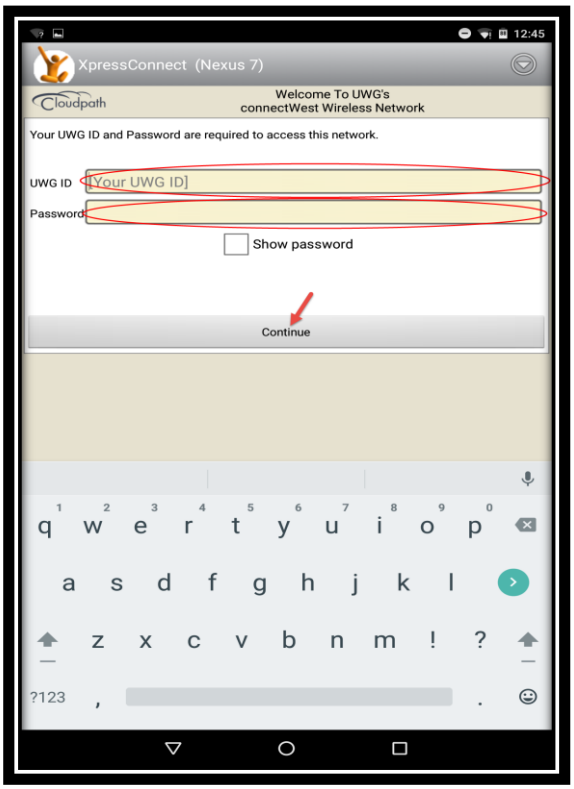
XpressConnect (Nexus 7)
Cloudpath
Use of the XpressConnect app requires that your organization has the proper server. If you are unsure, please contact your help desk.
Otherwise, to join a network using XpressConnect, please return to the web site that instructed you to download this app and click the link in step 2 of the Android instructions, or the "Setup WiFi" button.
For additional information on XpressConnect by Cloudpath Networks, Inc., please visit http://www.cloudpath.net or e-mail android@cloudpath.net.
Ok



On the next two screens you will be prompted for a name and password. Use your UWG ID for this. Be careful as if you enter the wrong info here you may have to start over to actually get connected.





Next you will see a confirmation that the profile was installed. Click “Done” in the top right.
Now your device is setup and should connect automatically while on campus.

Now you can open your browser and surf the internet. If you have any questions contact the Service Desk.
