* Discharge = total Discharges - Browsers

** Browse = Charge and Discharge within 1 minute. Traditional Browse transactions (Discharge without a corresponding Charge) are not recorded in the Voyager Circulation tables and cannot be tabulated for a period using data recorded exclusively therein. For a VRS solution, see the Circ report "Browse Counts by Location".

*** Renewal = Total number of items with a Renewal Count greater than zero for the specified time period. Because there is no way to discriminate among dates for two or more renewals on the same item, to keep from overstating the value the VRS count is incremented by one for each circulation item record with a Renewal Count equal or greater than one. The Renewal Count in this report is embedded within the Charges Count. Adding the two would result in double counting.

**** Fine = All Payments. Counts for all other Fine-Fee transaction types such as forgive, error, refund, etc., are excluded.

Variances in the Totals counts among Categories can be expected. The most absolute counts are those for Circ Desk. Variances typically are the result of maintenance activities such as location re-assignment, item deletion, patron group duplication and/or change, and so forth that have been applied to the database since selected Charges were recorded. Additionally, Voyager on occasion will assign an empty value to a control field in the transaction record (e.g., Location-ID = 0). Such non-standard assignments can cause associated records to be excluded from the range of counts for one Category but not from another. Also, remember that a Browse count can be added to the corresponding Discharge count to determine the total number of items that were discharged for a category during the period. Desk Location-IDs are provided in the Voyager tables for Charges and Discharges only. VRS makes no attempt determine where transactions for Browse, Renewal and Fine may have occurred. VRS date range selections are inclusive. Time stamps are included in the Voyager records. Each day starts at 12:00 midnight and ends at 11:59 PM the following evening (00:00:00 - 23:59:59).
