American Architecture
History 4404-01W and Art 4295-01W
Fall 2017

Dr. Ann McCleary, History Department
678-839-6141, amcclear@westga.edu
Office hours: Monday, 12-3; Tuesday, 3:30-4:30; and Thursday, 9-12; in the Center for Public History, and by appointment. The Center is located in the lower level of the Library. Center phone is 678-839-6141
Class meetings: Tuesday, 5:30-8 p.m. in Pafford 107

Course Objectives
The primary objectives of this course are to:
1. Provide an introduction to the development of American architecture from the colonial period to the present day;
2. Present the various methods one can use to study architecture;
3. Develop skills in documenting and interpreting historic buildings; and
4. Use architecture to study broader issues and questions in American history and culture.

This course will explore the evolution of American architecture with a particular emphasis on the "home" from the earliest European housing in the seventeenth century to the post-World War II ranch house. Through the lens of the American home, we will examine the various elements of architecture--including style, floor plan, interior design, furnishings, and building technologies and construction. A background in architectural styles is not required. Students will develop a working knowledge of styles and architectural terminology in this course.

In much of the class, we will focus on "vernacular," or ordinary, architecture, although we will also talk about significant architectural influences, styles, and trends as well as architects, reformers, and designers. Our study will reflect the interdisciplinary character of this field, drawing upon methodologies from art history, anthropology, archaeology, cultural geography, folklore and folklife, the history of technology, women's history, and American social and cultural history. The readings will reflect this variety of perspectives.

This course requires that all students attend two fieldtrips. These fieldwork experiences will teach students to apply their knowledge from readings and class discussions to dating and interpreting historic buildings. Each student will also complete a class project that documents a building or building complex or that interprets primary sources on American architecture.

DSW Designation
A A W@ designation means that this course is a “Disciplinary Specific Writing” course. (see https://www.westga.edu/dsw ) The guiding principle behind this designation is the idea that writing is a valuable tool for learning and communication. All W courses must require (a) at least one Writing-to-Communicate assignment that includes an iterative (draft-revision) process, and (b) a minimum of 4,000 words across all writing assignments, not including revisions.

Learning Outcomes
1. Students will be able to document and analyze a historical building by writing an architectural description of a building, identifying its style and/or period based on architectural features, drawing a
floor plan, interpreting the changes to the building over time, and assessing the meaning of the building.

2. Students will be able to conduct historical research in primary sources and to write analytically about the results of that research.

3. Students will be able to describe and interpret, in writing, the evolution of American architecture from the colonial period through the twentieth century from an interdisciplinary perspective.

4. Students will be able to use buildings to examine broader historical questions in U.S. history and to write about how buildings reflect the social, cultural, architectural, and political context in which they were created.

5. Students will be able to identify the methods that different scholars use to study architecture and the contributions that these scholars make to the field of architectural studies, including historians, architectural historians, cultural geographers, anthropologists, women’s historians, and historic archaeologists.

Course Readings

Required readings:

Recommended:

Course Requirements

Examinations (40% of final grade)
The course includes a midterm and a final examination, both drawn on readings and class discussions. The final exam will not be cumulative but will be based on materials from the second half of the class. Both exams will incorporate three major written components: an essay, interpretations of buildings shown in slides, and identifications of key terms, people, or concepts in the field. Each exam will be worth 20% of the final course grade.

Fieldwork Experiences (15%)
One of the best ways to learn about architecture is to visit buildings. Each student will be expected to attend two field trip excursions and write, for each excursion, a three-page, word-processed description of what he/she learned from the building. The essay must include:
1. an architectural description of the building, identifying its style and or period based on architectural features, and assessing the additions and changes to the building over its history;
2. a floor plan that illustrates the changes of the building over time;
3. an assessment of what the building tells us about the time and place in which it was created
4. your field notes from the time of the visit.

These fieldwork assignments must be turned in within two weeks of the field trip. Field reports turned in late will be marked down one grade for each day late. Hard copies are preferred, but digital copies submitted to Course Den will be accepted only if they include the floor plans and field notes as well (so you will need to scan those images).
Class project or paper (30%)  
The class paper or project offers students an opportunity to apply the knowledge gained in class to analyzing and interpreting some aspect of American architecture. A more detailed description of paper requirements will be provided and posted on Course Den. Students will have two choices for this project/paper:

Option 1: A thorough study of a building or building complex, including a written narrative of its history, an architectural description and analysis, floor plans, photographs, and an analysis of the building that places it in historical and architectural context. The contours of this study will vary with the building that the student chooses. The requirements of this assignment are similar to what you would include in a National Register nomination, but this assignment requires that you present what you have learned in an interpretive essay rather than report format. Please note that you may not select a building that is currently listed on the National Register of Historic Places or one that has already been extensively documented. You must select a building that needs research and analysis! If you would like to pursue this option and need help in selecting a building, please let me know.

Option 2: A research paper on an issue or topic related to American architecture using **primary sources, supplemented by secondary source material**. I would be happy to provide some suggestions based on your interests, so please contact me regarding the period or type of architecture literature of interest and we can brainstorm primary sources that you could use. Some possible options include:

a. Analysis of architectural literature. You have several options here,
   1. Analyze two to three pattern books from a certain time period to document a particular period of architecture. There is a wide range of this literature from the early nineteenth century through the present. For example, students have written about the bungalow, the Victorian house, or the 1920s home. You must choose two or three books to compare and contrast for this option.
   2. Compare two pattern books from different periods to explore how housing ideals changed over time.
   3. Analyze advice literature for women and the home, including popular literature or domestic manuals. This literature dates from the mid-nineteenth century to the present. You must have at least two or three primary sources.
   4. Explore a specific topic in American architecture through several pattern books or popular magazines. For example, students have written about the development of the kitchen or another room or space in the home using several pattern books.

An excellent database of such books is on-line at [www.archive.org/details/buildingtechnologyheritagelibrary](http://www.archive.org/details/buildingtechnologyheritagelibrary). The Association for Preservation Technology International (APT) created and maintains the **Building Technology Heritage Library (BTHL)**, a web-based digitized collection of archival architectural and construction trade catalogs, house plan books, and related publications.

b. Additional options you might consider, but please remember that you must identify a core of primary sources that you will interpret
   1. Use photographs to analyze architecture. For example, there are great photographs of sharecroppers housing and workers housing in textile communities or other company towns in the on-line American Memory collection of the Library of Congress. Even photographs of housing from the 1930s is documented through photographs taken during the Great Depression.
   2. Oral histories could be used to document a certain type of house or time period. For example, you might conduct oral histories with two or three farm families to learn about rural architecture, or mill workers to hear about how they used mill homes.
3. Sandborn fire insurance maps provide great insight into architectural development in small towns throughout Georgia. You could use several years from the Sandborn map to explore how architecture has changed in a specific town.

4. If you are interested in the colonial period, you could use a collection of probate inventories to analyze architecture in a specific community.

5. Collections of textile mill newsletters (mostly post WWII) provide excellent information about mill housing and life in a mill community. Students could read a collection of these newsletters and write about what they learned about mill housing and family life in a mill village. Collections exist for the Mandeville Mills (Carrollton) and some of the Goodyear plants in Cedartown, Rockmart, and Cartersville. The Mandeville Yarns are available in the Ingram Library Special Collections.

All papers must be ten pages of word-processed text, double-spaced, plus appropriate footnotes and bibliography. In addition, students must include visual documentation appropriate to their topic, such as photographs, illustrations, site plans, floor plans, etc. Please note that illustrations, bibliography, floor plans, and cover pages do not count in the final page total.

Project Schedule:

1. **Tuesday, September 12 by 5 p.m:** Project topics or ideas need to be submitted through Course Den.

2. **September 19:** We will meet with librarians who can help you find sources for your paper. All students are encouraged to make appointments to meet with these librarians individually to discuss their research.

3. **September 26:** A formal research proposal will be due, after we have our meeting with the librarian. This proposal must include: (1) your topic, (2) the primary sources you are using and (3) your secondary sources. Please submit a copy to me via both Course Den and a hard copy in class.

4. **November 7:** Each student will submit a full draft of the paper to me. Please note that a drafts of your research paper is required, since this is a DSW class. The draft must be at least eight pages and include some images and a draft bibliography. I will provide comments and suggestions for your revision.

5. **November 28:** Final paper due.

**Class participation and attendance** (15%)

Students are expected to complete the assigned readings before each class and to be prepared to discuss these readings at the class meeting. Class attendance is important because we will discuss the readings and view images that are essential to your understanding of the material. Please note that many of these images will not be available in your readings.

Because this class meets only once a week, we will move quickly through the course material. Regular class attendance will also help you perform better on the exams and class assignments. More than two unexcused absences will lower your final course grade one letter grade (10 points); more than four unexcused absences will lower it at least two grades, depending on the number of absences.

Additional Information

**Plagiarism is a serious offence.** Any example of plagiarism (even just one sentence) or other acts of academic dishonesty will be punished with an automatic “F” in the class. Claiming ignorance of what plagiarism is will not constitute a valid excuse. The History Department’s definition of plagiarism is available on-line at [http://www.westga.edu/~history/statementonplagiarism.pdf](http://www.westga.edu/~history/statementonplagiarism.pdf) to refresh your knowledge about this topic. See also the university honor code at
Cell phones and personal use of laptop computers will not be tolerated during class. Please turn off your cell phone when you come to class. Cell phones are distracting both to students and to faculty. If I see cell phones in use or on your desk during class, I will remove them for the remainder of the class. Similarly, laptops are suitable for taking notes but not for accessing the internet or other personal uses during the class. If I suspect that you are using your laptop for an activity other than note-taking, I will ask you to close your computer and not use it during class. If you want or need to use your laptop during class, please talk with me the first few weeks of class.

Art Department Course Fees: Fees for this course support the Visual Resources Center (VRC), a research and teaching resource in the Art Department. The VRC enhances student learning by providing access to images and other scholarly art historical resources, and by supporting student research and writing. Students have access to the VRC’s image database, MDID, in completing their semester projects. In addition, students have access to the research support offered by the VRC staff.

Additional Syllabus Information for all UWG courses: http://www.westga.edu/assetsDept/vpaa/Common_Language_for_Course_Syllabi.pdf

Class Schedule

Please note that this schedule is subject to change, based on how we are progressing through the class topics. All students are responsible for keeping up with any changes in topics and/or readings.

The field trip schedule will be announced. A schedule of field trips will be developed based on student schedules.

August 15
Course Introduction

August 22
Architecture, Housing, and Society in Early New England
Readings:
• Upton/Vlach: (Isham/Brown) pp. 149-158, (Cummings) pp. 219-239
• Wright: chapter 1
• “Bayleaf—Wealden Downland Open Air Museum,” at http://www.wealddown.co.uk/explore/buildings/further-reading/general-information-bayleaf-wealden-house/

August 29
Architecture, Housing, and Society in the Early Chesapeake
Readings
• Upton/Vlach: (Upton) pp. 315-35 and (Neiman) pp. 292-314;
• Wright, chapter 3;

September 5
Georgian Ideals and Cultural Diffusion
Readings:
• Upton/Vlach: (Kniffen) pp. 3-26; (Glassie and Kniffen) pp. 159-181; (Gowans) pp. 367-393; and (Glassie), pp. 394-432
• Roots, “The Scots-Irish” and “African Americans”

September 12
The Mid-Atlantic, the Upper South, and the Lower South Regions
Readings
• Roots, “The Germans”
• Upton/Vlach: (Chappell) pp. 27-57 and (Vlach) pp. 58-78.

DUE: Research ideas

September 19
Researching Historic Buildings
Guest speakers: Jessica Critten, Ingram Library, and Keri Adams, Center for Public History
Emails: jcritten@westga.edu and madams@westga.edu

September 26
Documenting Georgia Architecture
Readings:

Ethnic Architectural Across America
Readings
• Complete reading America’s Architectural Roots

DUE: Research Proposal

October 3
Midterm Exam

October 10
Early Nineteenth Urban Architecture and Landscapes and the Development of Architectural Pattern Books
Readings:
• Upton/Vlach: (Bishir) pp. 447-481
• Wright, chapters 2 and 4
• Clark, chapter 1.

October 17
The Cult of Domesticity, Mid-Nineteenth Century Pattern Book Architecture, Victorian Ideals, and Architectural Revivals
Readings:
- Upton/Vlach: (Ames) pp. 240-260;
- Wright, chapters 5-6
- Clark, chapters 2-3.

October 24
Turn-of-the-Century Architecture in the City: Industrialization, the Suburbs, and the Working Class Family
Readings
- Upton/Vlach: (Cohen) pp. 261-279
- Wright, chapters 7-8;
- Clark, chapter 4.

October 31
Architectural Reform: Bungalows, Home Economics, and the Progressive Housewife
Readings
- Upton/Vlach: (Lancaster), pp. 79-106;
- Wright, chapter 9;
- Clark, chapters 5-6;

November 7
Planned Housing: Company Towns, Planned Communities, and Public Housing
Readings
- Wright, chapters 10-12;
- Robert Blythe, “Unraveling the Threads of Community Life: Work, Play, and Place in the Alabama Mill Villages of the West Point Manufacturing Company,” on Course Den

DUE: Research paper draft

November 14
Post-World War II Suburban Housing, the Ranch House, and the Middle-Class Family Ideal
Readings
- Wright, chapter 13
- Clark, chapter 7-8;

November 21 No class, Thanksgiving Break!

November 28 The American Small House
Guest speaker: Dr. Richard Cloues, 5:30-6:45
DUE: Final research papers

December 5: Final exam, 5-7
Guide for Accessing the Plan Books
By Dr. Richard Clouse

The Association for Preservation Technology International (APT) created and maintains the Building Technology Heritage Library (BTHL), a web-based digitized collection of archival architectural and construction trade catalogs, house plan books, and related publications.

The collection contains materials printed and published before 1964 which are now in the public domain. The materials come from various libraries, museums, and private collections. The Canadian Centre for Architecture in Montreal was the first major contributor. To date, the BTHL contains 1,135 items including more than 350 house plan books -- and more are being added.

The house plan books can be viewed on-line or downloaded as PDFs.

The collection can (supposedly) be searched but only using a rather clumsy and complicated built-in search protocol with which I have had disappointing results …

To access the Building Technology Heritage Library – method 1:

The Building Technology Heritage Library is found at www.archive.org/details/buildingtechnologyheritagelibrary

After the Building Technology Heritage Library web page opens, scroll down to the bottom of the first “box” and click on “Browse by Subject/Keywords”

From the list of keywords, select “House Plans” for the longest list. You can also choose among “House Plans,” “House Plans-Catalogs,” etc.

To access the Building Technology Heritage Library – method 2:

cut and paste this rather unwieldy URL into your browser:
