
Instructor: Dr. Mark Faucette

Office: Boyd Building 323

Phone: My office phone number is 678-839-4133. Call and leave a message on my answering machine. I screen my phone calls, so make sure you leave a message.

E-Mail: My e-mail address is faucette@westga.edu.

The Web: My web page is at URL [http://www.westga.edu/~faucette/](http://www.westga.edu/~faucette/). The full course syllabus is located on my web site and can be downloaded as a pdf file. It is the student’s responsibility to download and/or to print the syllabus and to follow it.

Office Hours: My office hours are

- TR: 9:00 AM–11:30 AM

I do not hold office hours during final exam week.

Required Equipment: The following is required for this course:

- A graphing calculator is required for this course. You must have your calculator with you every class day.

Common Language for Course Syllabi: All Students Please Note!

For important policy information, i.e., the UWG Honor Code, Email, and Credit Hour policies, as well as information on Academic Support and Online Courses, please review the information found in the Common Language for Course Syllabi documentation at

It contains important material pertaining to your rights and responsibilities in this class. Because these statements are updated as federal, state, university, and accreditation standards change, you should review the information each semester.
Grading Policy

Homework (400 points) There will be homework that is assigned, taken up, and graded. These assignments will be scaled at the end of the semester to count four hundred points.

Tests (300 points) There will be three tests each counting one hundred points.

Final Examination (300 points) There will be one comprehensive final examination counting three hundred points.

At the end of the semester, the following grading scale will be used:

- 1000 points is the total number of points possible.
- A total of 900–1000 points earns an A.
- A total of 800–899 points earns a B.
- A total of 700–799 points earns a C.
- A total of 600–699 points earns a D.
- A total below 600 points earns an F.
Expectations

Attendance and Classroom Decorum: You are expected to attend class every class period. You are not allowed to come to class late or to leave early. You may not converse with other students during class time without my permission. I will allow some time for questions at appropriate points during the lecture, but you may not interrupt the lecture with questions. If you miss class for any reason, it is your responsibility to get the lecture notes from a classmate, read the text, and do the homework.

Technology: With the exception of the calculator required above, all technology is banned from the classroom. This includes, but is not limited to, all iPads, iPods, cell phones, and laptop computers. The only exception to this policy is that you may use an electronic pen and a notebook computer (e.g. an iPad) in order to take notes in the course, provided you use it for nothing else. Otherwise, if you are found to have an item of technology within view during class, you will be asked to leave class.

Course Content: The course will cover the topics listed on the attached lecture schedule.

Reading Assignments: You are responsible for reading and understanding the text before it is covered in class through lecture.

Lecture: The primary method of classroom instruction will be by lecture during class time. You are responsible for all the material presented in the lectures, regardless of attendance.

Extra Credit: There is no extra credit for any reason. All points must be earned on the participation, homework, quizzes, tests, and the final examination. I do not “curve” scores. That, too, is extra credit. You get the points you earn.

Make-Up Work: There are no make-up grades for any reason. Students having an absence for any reason on the day homework is due must complete that assignment on time. Students having an excused absence on the day of a test will have their test average entered for the missed grade. This may only be done once. Absences must be excused before they occur except in extraordinary cases, such as active military duty, jury duty, or hospitalization. Being sick, short of being hospitalized, is not an excuse. If you anticipate being absent from class for a religious holiday, it is your responsibility to notify me in advance.

Homework: Homework assignments will be made each week and will coincide with the class lecture. The homework problems may be either examples or applications of the theory presented in class, or expansion of that theory. You may complete the homework either individually or in small groups. Working in small groups is encouraged provided that each member of the group actively contributes to a discussion of the material and to solutions of the problems. You are responsible for completing every homework assignment, regardless of class attendance. Homework will be collected each Wednesday beginning in the second week of the semester.

There are no extensions on the due dates for homework for any reason.
Tests: There will be three tests administered on Monday, September 17; Monday, October 15; and Monday, November 12. You will need your calculator for each test.

Midterm: The last day to withdraw with a W is Monday, October 8.

Final Examination: There will be a comprehensive final examination administered on Wednesday, December 12, from 8:00 AM to 10:00 AM in room 303 in the Boyd Building.
MATH 2853 Lecture Schedule

Wednesday, August 15  Vectors
Friday, August 17  Dot Product
Monday, August 20  Hyperplanes in $\mathbb{R}^n$
Wednesday, August 22  Systems of Linear Equations and Gaussian Elimination
Friday, August 24  The Theory of Linear Systems
Monday, August 27  The Theory of Linear Systems
Wednesday, August 29  Some Applications
Friday, August 31  Some Applications
Monday, September 3  Labor Day Holiday
Wednesday, September 5  Matrix Operations
Friday, September 7  Linear Transformations: An Introduction
Monday, September 10  Inverse Matrices
Wednesday, September 12  Elementary Matrices: Rows Get Equal Time
Friday, September 14  The Transpose
Monday, September 17  Test 1
Wednesday, September 19  Subspaces of $\mathbb{R}^n$
Friday, September 21  Subspaces of $\mathbb{R}^n$
Monday, September 24  The Four Fundamental Subspaces
Wednesday, September 26  The Four Fundamental Subspaces
Friday, September 28  Linear Independence and Basis
Monday, October 1  Linear Independence and Basis
Wednesday, October 3  Dimension and Its Consequence
Friday, October 5  Fall Break
Monday, October 8  Dimension and Its Consequence
Wednesday, October 10  A Graphic Example
Friday, October 12  Abstract Vector Spaces
Monday, October 15  Test 2
Wednesday, October 17  Inconsistent Systems and Projection
Friday, October 19  Orthogonal Bases
Monday, October 22  The Matrix of a Linear Transformation . . .
Wednesday, October 24  . . . and the Change of Basis Formula
Friday, October 26  Linear Transformations . . .
Monday, October 29  . . . on Abstract Vector Spaces
Wednesday, October 31  Properties of Determinants
Friday, November 2  Properties of Determinants
Monday, November 5  Cofactors and Cramer's Rule
Wednesday, November 7  Cofactors and Cramer's Rule
Friday, November 9  Signed Area in $\mathbb{R}^2$ and Signed Volume in $\mathbb{R}^3$

Homework Policies

A sophomore level linear algebra course is historically a course in which students first begin to develop the techniques of producing and writing proofs. Since this is probably your first exposure to writing mathematical proofs, the proofs you will be assigned are relatively straightforward and usually computational in nature. The purpose here is to give you a good foundation in thinking mathematically.

The following rules tell you how your homework should be presented when you submit them to me.

1. For your homework, please use standard 8 1/2 inch by 11 inch lined notebook paper. I don’t care if it has holes or not, but I want it to be the correct size and I want it lined.

2. I do not want any “ragged edges.” Do not tear paper out of a spiral bound notebook to hand in.

3. Write only on the front side of the paper. I do not want to have to flip your papers continually from front to back to front to back to grade them.

4. In the upper right corner of the first page should be your name, “MATH 2853-1,” and the homework assignment number.

5. Each problem should begin at the top of a new piece of paper on the left side of the page. If the problem is divided into parts, such as (a), (b), (c), etc., this doesn’t mean each of these should start on a new page. However, I’d like each problem to begin at the top of a new piece of paper. If a problem continues onto a second page, that’s fine, but I want the start of each problem at the top of a new page.

6. For each problem the first thing you should write down is “Exercise” followed by the exercise number you’re working on. Then you should write the problem as stated in the book. This tells me what you’re doing.

7. You should next begin your proof with the word “Proof” underlined with a colon following it. This tells me you are starting your proof. If the problem is not a proof but a computation, example, counterexample, etc., simply write “Solution” underlined with a colon following it. Then put your solution.

8. Every mathematical proof should be written in sentences and paragraphs. A mathematical proof is equivalent to an English essay. It should be written that way. This means you probably should write a first draft of each proof before writing a final draft to turn in. I want your proofs to be aesthetically pleasing, as well as mathematically correct.

9. Make sure the logic in your proofs is sound.

10. When you finish your proof, put something to indicate your proof is complete. You can use □ or ■ or // or QED or something similar as long as you’re consistent.

11. Put your solutions and proofs in the order they are in the text book. I don’t want to have to search through your homework to find where you’ve put each problem.

12. Each of your assignments should be stapled together. This means I do not want them paper-clipped or taped or “crinkle-cornered”.

7
13. Your homework is due on the date given on the Assignments page for your course on my web site:
https://www.westga.edu/~faucette/teaching/Fall_2018/MATH28531/Assignments.html.
There is a link to this page in the section of my web site dedicated to your course:
https://www.westga.edu/~faucette/teaching/Fall_2018/MATH28531/index_frameset.html.
This is also where your homework assignments will be posted each week.
I do not take any work late.

14. You are permitted (and, in fact, encouraged) to work together on the solutions to the weekly homework assignments (with the exception of the pledged problem sets, where you may not work together). However, the work must be your own. You can share ideas and understanding, not proofs or solutions.

15. I am well aware that both the textbook and the solution manual are available online free as pdfs. I have both of them. If you choose to copy your homework solutions from a published solution manual, I will catch you and I will fail you in the course. Trust me: I can tell the difference between a proof you can write and a proof a text book author writes. And if you copy from a solution manual, you had best hope it’s not the one I have. If so, I’ll have sufficient evidence to have you brought up on disciplinary charges with the Dean of Students.
Academic Honesty
Prohibited Conduct

The penalty for violating this policy is failure in the course.

General standard of conduct: No student shall knowingly perform, attempt to perform, or assist another in performing any act of dishonesty on academic work to be submitted for academic credit or advancement. The term “knowingly,” as used in the preceding sentence, means that the student knows that the academic work involved will be submitted for academic advancement. “Knowingly” does not mean that the student must have known that the particular act was a violation of the University’s academic honesty policy. A student does not have to intend to violate the honesty policy to be found in violation. For example, plagiarism, intended or unintended, is a violation of this policy.

Examples of Academic Dishonesty: The following acts by a student are examples of academically dishonest behavior:

I. Plagiarism - Submission for academic advancement the words, ideas, opinions or theories of another that are not common knowledge, without appropriate attribution to that other person. Plagiarism includes, but is not limited to, the following acts when performed without appropriate attribution:
   A. Directly quoting all or part of another person’s written or spoken words without quotation marks, as appropriate to the discipline;
   B. Paraphrasing all or part of another person’s written or spoken words without notes or documentation within the body of the work;
   C. Presenting an idea, theory or formula originated by another person as the original work of the person submitting that work;
   D. Repeating information, such as statistics or demographics, which is not common knowledge and which was originally compiled by another person;
   E. Purchasing (or receiving in any other manner) a term paper or other assignment that is the work of another person and submitting that term paper or other assignment as the student’s own work.

II. Unauthorized assistance - Giving or receiving assistance in connection with any examination or other academic work that has not been authorized by a faculty member. During examinations, quizzes, lab work, and similar activity, students are to assume that any assistance (such as books, notes, calculators, and conversations with others) is unauthorized unless it has been specifically authorized by a faculty member. Examples of prohibited behavior include, but are not limited to, the following when not authorized:
   A. Copying, or allowing another to copy, answers to an examination;
   B. Transmitting or receiving, during an examination, information that is within the scope of the material to be covered by that examination (including transmission orally, in writing, by sign, electronic signal, or other manner);
   C. Giving or receiving answers to an examination scheduled for a later time;

---

1The content of this page is taken from the document Academic Honesty Policy (A Culture of Honesty), Section 5, The University of Georgia.
D. Completing for another, or allowing another to complete for you, all or part of an assignment (such as a paper, exercise, homework assignment, presentation, report, computer application, laboratory experiment, or computation);

E. Submitting a group assignment, or allowing that assignment to be submitted, representing that the project is the work of all of the members of the group when less than all of the group members assisted substantially in its preparation;

F. Unauthorized use of a programmable calculator or other electronic device.

III. Lying/Tampering/Bribery - Bribery or giving any false information in connection with the performance of any academic work or in connection with any proceeding under this policy. This includes, but is not limited to:

A. Giving false reasons (in advance or after the fact) for failure to complete academic work. This includes, for example, giving false excuses to the Faculty Member or to any University official for failure to attend an exam or to complete academic work;

B. Falsifying the results of any laboratory or experimental work or fabricating any data or information;

C. Altering any academic work after it has been submitted, unless such alterations are part of an assignment (such as a request of an instructor to revise the academic work);

D. Altering grade, lab, or attendance records. This includes, for example, the forgery of University forms for registration in or withdrawal from a course;

E. Damaging computer equipment (including disks) or laboratory equipment in order to alter or prevent the evaluation of academic work, unauthorized use of another’s computer password, disrupting the content or accessibility of an Internet site, or impersonating another to obtain computer resources;

F. Giving false information or testimony in connection with any investigation or hearing under this policy;

G. Submitting for academic advancement an item of academic work that has previously been submitted (even when submitted previously by that student) for academic advancement, unless done pursuant to authorization from the Faculty Member supervising the work or containing fair attribution to the original work.

IV. Theft - Stealing, taking or procuring in any other unauthorized manner (such as by physical removal from a professor’s office or unauthorized inspection of computerized material) information related to any academic work (such as exams, grade records, forms used in grading, books, papers, computer equipment and data, and laboratory materials and data).

V. Other - Failure by a student to comply with a duty imposed under this policy. However, no penalty is imposed under this policy for failure to report an act of academic dishonesty by another or failure to testify in an academic honesty proceeding concerning another. Any behavior that constitutes academic dishonesty is prohibited even if it is not specifically listed in the above list of examples.
