Guidelines for Term Project

Overview
You will be working on a group research project. Each group should have two to five people. No individuals will be allowed to do the project on their own. No group should have more than five people. Your roles are that of marketing consultants who work for an organization requiring a sound international marketing plan to help make international marketing decisions. You will prepare an international marketing plan based on what you have learned from the course.

Objectives
This project is designed to provide a major "hands-on" experience. It will enable you to apply the concepts covered in the text and in class and to integrate the inter-related series of steps in the IM process. Specifically, the purposes of this assignment are for you to:

- Learn how to practically apply marketing theory and practice to an international setting;
- Work through the international marketing decision making process, becoming familiar with the decisions that need to be made at each stage of going international;
- Become more familiar with course material by discussing it with others; and
- Develop your written communications skills and ability to think and write critically and creatively. Also, it can give you something worthwhile to put on your resume and discuss in job interviews—you served as an international marketing consultant.

Identification of Foreign Country
Each group will select a foreign country from the following list. The list includes 15 countries from five continents and each country can only be chosen once:

- Africa: Egypt, Nigeria.
- Asia: India, Indonesia, Pakistan, China, Mongolia.
- Europe: France, Finland, Italy, Portugal, Switzerland.
- Latin America: Columbia, Mexico, Peru, Panama, Dominica Republic.

You will find information about the country by yourselves. The project should strictly follow the following format.

Components of the Term Project

- Cover Page (2 points)
- Executive Summary (3 points)
- Cultural Analysis (10 points).
- Economic Analysis (10 points).
- Marketing Strategy & Implementation (12 points)
- Paper format, neatness, grammar, punctuation etc. will be worth 3 points. The total points for the project is 40.

Section 3: Market Entry and Marketing Strategies (5-7 pages)
This section is the most important section of your project and MUST include all the following five sections:

I. Market entry strategies:
   First, you will discuss differences of different entry strategies and recommend one or two to the U.S. companies for doing business in the country. The popular entry strategies include exporting, licensing, joint venture, contract manufacture, ownership and participation in export processing zones or free trade zones. Then, you will discuss both advantages and disadvantages of the selected entry strategies.

II. Product strategy:
   First, you will discuss whether US companies should use the standardization or adaptation strategies, why, and how.
   Then, you will recommend specific product positioning strategies for US companies in the local market, you should explain why and how.

III. Price strategy:
   First, you will make recommendations on pricing policies that should be followed by US companies based on the economic level of the country. For instance, if your country is underdeveloped with low GNP, you may not want to recommend high pricing policies because of relatively low purchasing power of local consumers.

IV. Place or distribution strategy:
   You will discuss whether local channels to be used or new channels to be built from scratch. For your recommendations, you must justify them according to the cultural characteristics of that country. For instance, a collectivistic country emphasizes long-term relationships, so it will be more effective for the US companies to use the local channels in countries with a collectivistic culture.

V. Promotion strategy:
   First, you will first discuss the advantages and disadvantages of different promotional forms (sales promotion, advertising, direct marketing, personal selling, and public relations) in that country.
   Then, you will make your recommendations for U.S. firms. For instance, when you talk about advertising in that country, you should explain which medium (e.g., radio, TV) is better, and which medium may not work in that country. You should mention the Internet too. As for ad message, you will explain whether collectivistic or individualistic forms of messages should be adopted etc.

1. Notes:
   - Base your marketing strategies on your cultural and economic analyses.
Your paper will have **all the levels of subheadings** listed in the outline. I suggest you use the outline above as a start and insert the required information to the text. Each part should be appropriately divided into paragraphs (it is not acceptable to put everything in one lengthy paragraph).

Put the conclusion at the very end of your paper. Just write one paragraph to summarize your paper.

The entire paper will be approximately 15 pages in length including executive summary, charts, exhibits, etc. It should be **single-spaced, 12 Time New Roman font with 1 inch right and left margins and 1 inch top and bottom margins.**

Some parts of the paper should simply restate the facts on the selected country, but some parts, especially market entry and marketing strategies section should take our understanding of international marketing to a higher level. This requires application of the various concepts and models to the international situation.

Data from an Internet source should be cited and should be a reliable, recognizable source of data. For example, using government census data would be considered reliable.

The written section will be evaluated as a professional marketing plan. This means that the marketing plan is representative of one that you would expect to read if you were current CEO in the company.

When you submit with the paper, please make sure that:

A. Cover of your paper will have the following items:
   - Topic of your paper: Marketing Strategies for US Companies in (country name)
   - Name of the group members
   - Course: For MKTG4866
   - Time: Summer 2019

B. Appendixes: any information you think important and necessary to include. They can be a group of pictures, or a logo, or a map of the country.

C. Please remember to have **Page Number**. A paper without page number will lose three (3) points from the final course grade.

Please remember to include references at the end of the paper. You will lose 3 points if your final paper does not have references.
