Course Description  
This course represents one of the program's fundamental approaches to the study of consciousness and society. The course examines the paradigm of psychology as a specifically humanistic discipline. Its focus is on the historical origins and philosophical foundations of this approach.

Course Objectives  
Seminar members will develop and express knowledge concerning, and understanding of, the humanistic tradition in psychology, its historical origins and philosophical foundations.

Required Texts  
Texts will consist of required books, and other materials (i.e., book chapters, essays, etc.) on electronic reserve, and/or handed out in class. The required/suggested books are as follows:

- The Passion of the Western Mind, Richard Tarnas (suggested)  
- Cosmopolis: The Hidden Agenda of Modernity (Chicago UP, 1992), Stephen Toulmin  
- Fear and Trembling, Soren Kierkegaard (Penguin, Hannay Trans.)  
- Thus Spoke Zarathustra, Friedrich Nietzsche (Penguin, Kaufmann Trans.)  
- Discourse on Thinking, Martin Heidegger (Harper, Anderson & Freund Trans.)  
- The Discovery of Being (1983), Rollo May  
- Toward a Psychology of Being (1999, 3rd Ed.), Abraham Maslow  
- On Becoming a Person (1961), Carl Rogers  
- The Suffering Stranger: Hermeneutics for Everyday Clinical Practice, Donna Orange  
- Existential Africana: Understanding Africana Existential Thought, Lewis Gordon  
- The Body’s Recollection of Being: Phenomenological Psychology and the Destruction of Nihilism, David Michael Levin

Course Format  
The course is a seminar, and will be primarily based around class discussion with student presentations/discussion facilitation. As such, students will be expected to be consistently and thoroughly prepared by reading all of the assignment material, coming to class with questions and issues in mind, and participating actively in discussion. If a student is not adequately prepared (has not done the reading), he/she cannot meaningfully contribute to our discussion. “Seminar” derives from the Latin seminarium, meaning “seed plot.” Ideally, we will all learn from
each other, and that our time together will be fertile ground for the exchange of perspectives and the growth of understanding.

Course Requirements & Expectations

Attendance: It is vital that you attend all class meetings unless there is a very good reason for you not being present. In a seminar, we are all teachers and when someone is absent the teaching suffers. In my experience, more than three (3) absences will likely result in diminished understanding and engagement.

Participation: Because the seminar format requires consistent participation from its members, a significant portion of the grade will be based on weekly reading assignments – in the form of discussion and group facilitation/presentation (which will rotate).

Research Paper: It is expected that each student will complete a written twenty to twenty-five (20-25) page (double-spaced, 1 inch margin, APA style, etc.) research paper. The paper will examine some aspect of humanistic psychology pursuant to the student’s interest. It is expected that this paper will be scholarly and, perhaps, of publishable quality. Papers are due on May 7.

Academic Honesty: Students are responsible for upholding the University’s honor code.

Other Student Rights & Responsibilities: Students should carefully review information here:

http://www.westga.edu/assetsDept/vpaa/Common_Language_for_Course_Syllabi.pdf

It contains important material pertaining to your rights and responsibilities in this class. Because these statements are updated as federal, state, university, and accreditation standards change, you should review the information each semester.

Evaluation

Grading is collaborative; we will have a conversation concerning what grade is appropriate. Here is a suggested breakdown of grading:

   Participation: 50%
   Final Paper: 50%
