SELECTED SPECIAL PROJECTS ON TEACHING, LEARNING AND TECHNOLOGY

Stories from Home: Using and Integrating Technology in International Contexts (2015 and 2016)

Initiated a new community outreach program where International Division members can share experiences of using and integrating technology in educational settings in their home countries.

Doctor Is In: Consultation on Teaching, Research and Service in International Contexts (2014, 2015 and 2016)

Initiated a one-stop consultation service for International Division members interested in researching international context as well as issues about job search, tenure, promotion of international faculty in American higher education institutions.

Who's Who in the International Division (2014, 2015 and 2016)

Initiated a poster program to increase visibility and presence of International Division members to the AECT community. Posters are later auctioned to raise funds in support of the International Division activities.

Higher Education

Instructional Technology Forum (2018)

Coordinated a professional development event that will provide a forum on the convergence of teaching and technology for integrated and sustained learning. It is a collaboration between the Department of Educational Technology and Foundations (ETF) and the Georgia Association of Instructional Technology (GAIT). The event will involve presentations demonstrating the implementation of current technologies and technology integration practices that impact teaching and learning. It provides opportunities for conversations focusing on sharing online and digital resources that sustain the effective professional development in diverse settings. Finally, it is an opportunity to network with practitioners, GAIT members, and ETF faculty, students and alumni.

Using Data to Explore a New Program Track for Trainers, Developers, and Designers (2017)

“Excellence in research and graduate/professional education” is a strategic imperative for the University System of Georgia that the Department cannot ignore given changing populations, enrollment management, program sustainability, and new opportunities for curriculum development. The project was designed and implemented to promote the collection and use of data to support program-based decision-making.

Immersive Undergraduate Research and Mentoring Experience (2014-2015)

Given the pursuit of “excellence in research and graduate/professional education” as a strategic imperative for the University System of Georgia, this project built a good foundation of research knowledge and skills, especially at the undergraduate level. The project was designed and implemented to promote student engagement and retention.

Special Education Specialist Students Research Bootcamp (2014)

In collaboration with the Special Education faculty, providing support to her six (6) Educational Specialist (Ed.S.) degree students in completing their thesis using a Boot Camp format. This service project involved four full-day Saturdays from July to September 2014.

Faculty Studio for Teaching and Technology (2011-2012)

In collaboration with the current department chair, conceptualized a one-stop multimedia studio to support faculty work in designing and developing digital resources (audio, video) for online teaching. Education Annex 123 was converted into the proposed facility with support from eTuition funds.

Magic Mondays Workshops (2010-2011)

Designed, developed, and implemented small group, hands-on workshops once a month (November-March) for the College of Education faculty to enhance knowledge and skills in using emerging Web-based applications (*Comic Life*, *Moviemaker*, *Voice Thread*, *Blogger*, and *Google Applications*) that can be integrated into their curriculum to support student learning. Also, these workshops were made available to other faculty members outside of the college. This initiative was supported by the Faculty Development, Mentoring and Retention Committee.

LMS Transition Research Project (2009-2010)

Designed, developed, and implemented a research project on faculty responses to changes in the learning

management system (LMS) used to support online/hybrid course delivery in the middle of an academic year. The project surveyed education faculty on factors that enhance/impede a smooth LMS transition. Focus group interviews were conducted as follow up to the survey that validated the initial themes and patterns identified. The project resulted in local and national presentations, and publication in an edited book.

R2D2 Faculty Development Project (2009-2010)

Developed a written proposal for supporting faculty development through cross-disciplinary collaboration among faculty members. It proposed the engagement of two faculty members from two divergent disciplines in developing a faculty development event that describes and discusses discipline-specific tools, applications, or strategies using an R2D2 framework (Read-Demonstrate-Reflect-Do). After the presentation, the faculty members should identify similarities and differences of using or implementing these resources and practices in their disciplines. The proposal was presented to the Provost's office and received a positive response for possible implementation in the following academic year. Further, the proposal was presented at a regional faculty development conference and received a positive response for feasibility and value, too.

Atlanta to Manila Moodle Research Project (2008-2009)

Designed, developed, and implemented a collaborative learning research project between undergraduate students enrolled in teacher education programs at two universities -- Centro Escolar University (Manila, Philippines) and the University of West Georgia (Georgia, USA) --- using Moodle, a server-based application. Students interacted with each other and discussed common topics related to teaching and learning in K-12 contexts. Also, they provided feedback on assignments related to their coursework. The project resulted in three international presentations, and three publications.
