

TANNER HEALTH SYSTEM SCHOOL OF NURSING

TANNER HEALTH SYSTEM SCHOOL OF NURSING

At the University of West Georgia's Tanner Health System School of Nursing, we train tomorrow's nurses in a caring environment built on collaborative relationships. We provide unparalleled academic opportunities in undergraduate and graduate programs with the flexibility to meet the healthcare industry's ever-changing needs.

Industry officials predict more than 900,000 registered nurses will be needed across the nation by 2020. Georgia expects to see a shortage in qualified nurses. At the same time, nursing schools are filled to capacity and facing their own shortage as a wave of retirement is expected to ripple through college and university faculty. We are ready to help on both fronts by graduating the top nurses in the field and educating faculty who will lead those classes in the future through our MSN and Ed.D. programs.

Our faculty includes nursing professionals with expert knowledge to prepare students within our simulation and skills laboratories and through clinical experiences. We operate from a new building on the Carrollton campus and a newly renovated nursing lab and simulation suite at UWG Newnan. With state-of-the-art spaces for low-fidelity skills practice, physical examinations, high-fidelity simulation hospital rooms and home health simulation rooms, our facilities provide the ideal environment in which nurses can learn.

UNDERGRADUATE DEGREES

BSN
RN to BSN

GRADUATE DEGREES

Master of Science in Nursing (MSN)
Nursing Educator
Health System Leadership
Clinical Nurse Leader

**Doctorate in Nursing Education
(Ed.D.)**
